ALEX MERCER

Senior Backend AI Engineer Email: alex.mercer@email.com | LinkedIn: /in/alexmercer

PROFESSIONAL SUMMARY

Results-driven Senior Backend AI Engineer with over 5 years of experience engineering scalable microservices and deploying enterprise machine learning models. Proven track record of leveraging Python, AWS, and advanced NLP techniques to optimize system performance by over 40% and drive business growth in Agile environments.

CORE SKILLS

- **Programming & Frameworks:** Python, Django, Flask, REST APIs, Microservices
- **Data & AI:** Machine Learning, NLP, PyTorch, Deep Learning
- **Cloud & DevOps:** AWS, Docker, CI/CD pipelines, Git
- **Databases:** PostgreSQL, SQL
- **Soft Skills:** Agile Methodology, Problem Solving, Communication, Teamwork

PROFESSIONAL EXPERIENCE

Lead Backend Engineer TechNova Solutions | Jan 2021 – Present

- Engineered robust scalable backend microservices using Python and Django, increasing API request throughput by 35%.
- Deployed advanced Machine Learning and NLP models utilizing PyTorch, achieving a 92% accuracy rate in automated text classification.
- Orchestrated cloud infrastructure on AWS and containerized core applications with Docker, reducing average deployment times by 50% via automated CI/CD pipelines.
- Optimized complex database queries in PostgreSQL, improving data retrieval speeds and reducing server load by 40%.
- Collaborated daily in a fast-paced Agile environment, mentoring junior developers and enhancing team communication and problem-solving efficiency.

Software Engineer DataStream Inc. | Jun 2018 – Dec 2020

- Developed and maintained scalable REST APIs using Flask and Python to support high-traffic web applications.

- Designed dynamic data pipelines and managed relational databases using PostgreSQL.
- Automated testing and deployment workflows using robust CI/CD practices and Docker containers.

EDUCATION Bachelor of Technology in Computer Science University of Technology | 2014 – 2018
